-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Continued Prosecution Application

1. The Request for Continued Examination (RCE) filed on 1/30/2006 under 37 CFR 1.114 based on parent Application No. 10/615,677 is acceptable and a RCE has been established. An action on the RCE follows.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 5 and 32 are rejected under 35 U.S.C. 103(a) as being unpatentable over Nakamura (6,546,210) in view of Honma et al. (5,373,718; hereinafter Honma'718) and Guckenberger (5,630,308). Nakamura discloses a ream of print medium in a media wrapper (50) comprising a quantity of print medium such as paper (1) and a wrapper/wrapping means containing the quantity of print medium and the wrapper having a first end (51), a second end (52) and a perforation/separating means (53) disposed between the first and second ends and configured to split the wrapper to separate the first and second ends such that the first end is removed to expose the quantity of print medium. Nakamura further discloses a placement indicator (59) comprises a label and the wrapper (50) is made of vinyl sheet or hard resin (column 12, lines 22-24). Nakamura also discloses the other limitations of the claims except for a pull-tab being configured to split the perforation and the pull-tab comprises an extruded portion of the wrapper.

Art Unit: 3728

Honma'718 shows a package (10) containing an article (12) comprising a wrapper (11) having a severing tape (13) configured to split the wrapper and the severing tape including a pull-tab (16, 16a) (Figures 3-4). Guckenberger teaches a package (600') comprising a wrapper (600) having a separating means such as perforations (125, 125') configured to split the wrapper and the separating means including a pull-tab (626') comprises an extruded portion of the wrapper (column 6, lines 65-67 and Figures 6-7). It would have been obvious to one having ordinary skill in the art in view of Honma'718 and Guckenberger to modify the wrapper of Nakamura so the perforation includes a pull-tab as taught by Honma'718 to facilitate removing the wrapper and the pull-tab comprises an extruded portion of the wrapper as taught by Guckenberger so the wrapper and the pull-tab are formed during manufacture the wrapper to reduce the cost.

Allowable Subject Matter

4. Claims 6-8, 12 and 33-35 are allowed since the prior art of record fails to teach or suggest the nap of the print media refers to differing surface textures of the print media as indicates by paragraph 0020 of the specification of the instant patent application.

Response to Arguments

Applicant's arguments with respect to 1/30/2006 have been considered but are deemed to be moot in view of the new grounds of rejection.
